

Key Features

- High quality OFC conductor
- Fully Shielded cable
- No external power required
- Extends USB 2.0 up to 50M
- Plastic Free Packaging
- 10 Year Warranty

Overview

This product extends USB 2.0 signal between Transmitter and Receiver over twisted pair CATx cable. It supports USB 2.0 signals up to 50Mtr and does not require any power. It can be used as a direct link or through a patch panel, provided the maximum length of 50Mtr is observed, not for use through a switch. The transmitter and receiver have short fly leads on each, the receiver being female USB, so if being used as a link for projector or printer, a short male to male lead will be required for the final connection.

Product Specifications

Feature	Values
Type of connector connection 1	USB-A
Connection type connection 1	Plug (Male)
Type of connector connection 2	USB-A
Connection type connection 2	Socket (Female)

Additional specifications

Features	Values
Max Distance	50m
Plug Head Type	Plastic
